

Holy Connection, Inc.

Taking the Word of God Outside the Church Walls!

HCI Media Streaming System Requirements

- A dedicated computer or laptop (P4 2.8 or greater) that runs the Windows operating system. (Windows XP or higher.)
- An available Fire wire port or qualified video capture device that is based on the type of camera used.
- High Speed (Ethernet) Internet connection. Upload speed must be at least 375 kbs. You can also use CLEAR Super Fast Wireless Internet.
- Video Camera

Desktops

P4 3.0 gig or Core2 Duo 1.7 and up / 512K -1gig ram / 40gig hdd / USB 2.0 / 16bit Sound Card / DVD ROM / Available PCI Slot / Windows 2K – XP / Vista not preferred but allowed.

Laptops

(Same as above) however, a desktop allows for greater reliability and it provides a wider range of options.

Video Capture solutions

- Direct Capture to FireWire Port (Desktop or Laptop) Note: FireWire performance may vary depending on the manufacturer specs. Also requires a camera with DV out connector. Other cameras may have USB output to allow Webcam mode; this is only recommended for Higher End Cameras. (Most items can also be found at Best Buy, Fry's and possibly Radio Shack.)
- Pinnacle Movie Board (**Preferred for desktops with available PCI slot**)
